SUMMARY

Frontend-focused Fullstack Engineer with 5 years of experience designing and scaling enterprise-grade web platforms. Skilled in optimizing performance, delivering digital-first customer experiences. Trusted partner to architects and cross-functional teams in driving digital transformation, balancing innovation and strengthening business outcomes.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python	Frameworks: React JS, React Native, Next JS, Express JS
Databases: MongoDB, Firebase, PostgreSQL, Redis	Web & API: HTML, CSS, SASS, REST, GraphQL
Tools: VSCode, Jira, Figma, Rspack, Vite, Cursor, GitHub Copilot	Testing & Monitoring: Dynatrace, Jest, Bugsnag, Crashlytics
AI & Data: Generative AI, LLMs, RAG, TensorFlow, PyTorch, Power BI	Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Jenkins, CI/CD

PROFESSIONAL EXPERIENCE

AT&T Fullstack Developer | USA | July 2024 – present

- Built reusable React.js and Next.js components for SSR/SSG, and managed state and data flows with Redux for AT&T Sales and Support platform, optimizing multi-tenant architecture with reusable, modular design.
- Improved site performance through Next.js server-side rendering (SSR), dynamic imports, code splitting, image optimization and edge caching, improving Core Web Vitals (LCP, FID, CLS) and reducing TTFB for faster SEO and better user experience.
- Monitored performance using Dynatrace, ELK, and Catchpoint, pinpointed and resolved bottlenecks, improving core LCP by 25%.
- Delivered fully WCAG-compliant and screen-reader accessible interfaces across AT&T web platforms.
- Well-versed in AI-assisted coding and advanced debugging with MCP Server and GitHub Copilot to speed up code development.

City of Charlotte Senior Software Developer | Remote, USA | Nov 2022 - Oct 2023

- Led the design and development of ReactJS and Apollo GraphQL web apps, integrated with AWS and Git, automating city services for 100K Charlotte residents across utilities, transportation, and emergency response.
- Designed and implemented Backend-for-Frontend (BFF) layers using Java (Spring Boot) and NodeJS, aggregating multiple microservice responses and async request handling.
- Rapidly resolved critical real-time production issues, ensuring uninterrupted government services access for city residents.

Edged Energy Intern | India | May 2021 – Aug 2022

- Optimized analytics and insights by integrating real-time monitoring and dashboards, enabling data-driven decisions for performance tuning and feature prioritization.
- Automated end-to-end ETL pipelines using Workato, transforming unstructured Autodesk data into SQL databases and feeding Power BI dashboards, reducing manual processing by 80% and enabling real-time reporting.
- Built customer-centric dashboards and APIs that increased user engagement by 25% and boosted subscription conversion rates.

Accenture Web Developer | India | Oct 2018 – Nov 2020

- Scaled AT&T's digital platform by migrating legacy components to ReactJS/NextJS micro frontends and containerized NodeJS.
- Accelerated feature delivery by standardizing shared component libraries and REST APIs, enabling cross-team reuse and cutting rollout cycles by weeks.
- Improved platform reliability by 25% with centralized error monitoring, logging, and automated rollback strategies, reducing downtime and production incidents.

EDUCATION

Master of Science, Computer Science (Special Distinction - 4.0 GPA) California State University, Los Angeles	USA Aug 2022 – May 2024
Bachelor of Engineering, Computer Engineering Savitribai Phule Pune University	India Aug 2014 – May 2018
